To Resolve MySQL Port and Service conflict when already another MySQL Server is running, you need to follow following steps:-

1. Close XAMPP Server
2. Open file C:\xampp\mysql\bin\my.ini (C: is the default XAMPP Installation)
3. Replace the port number 3306 with 3307

`# password = your_password port = 3307 socket = "C:/xampp/mysql/mysql.sock"`

and

`\# The MySQL server [mysqld] port= 3307`

4. Save the file and open XAMPP Control Panel
5. In XAMPP Control Panel Click on **Config** > **Service and Port Settings**
6. Goto **MySQL** Tab
7. Change Service name **mysql** to **mysqlxampp** and Main port **3306** to **3307**
8. Click on Save then Save and close XAMPP
9. Run Again XAMPP and you will be able to start the MySQL Server

You might also face issue with phpMyAdmin

For which you can add line

`$cfg['Servers'][$i]['port'] = '3307';`

in your config.inc.php file in phpMyAdmin root directory.
